

## Rocket Fuel

©Joy Davis 2004 www.joydavisongs.com

I found an energy source for gett'n to the next plateau  
It won't get you dirty, or smell up the air, its supply can never run low  
Gonna take all of the energy, it takes life to blow up on me

### Chorus:

And make rocket fuel,  
    Turn'n bad to cool  
It's a power tool  
    For makin' rocket fuel  
I used to hang on to my blues  
'Til I found out I could use  
Them to make rocket fuel

Every time an old way explodes, new power is released  
I can sit in the rubble and play with my toes or strap a saddle on the beast!  
From the view way up here in the clouds, I see how all that mess was allowed

### Chorus:

And make rocket fuel,  
    Turn'n bad to cool  
It's a power tool  
    For makin' rocket fuel  
I used to hang on to my blues  
'Til I found out I could use  
Them to make rocket fuel

The bigger the burden, the better the bang, so after all that I've been through  
I'm gonna turn those challenges into fuel for a lifetime pass to the moon  
Gonna blast my way to another dimension,  
Burn my troubles and set the intention to  
Rise

I used to hang on to my blues  
'Til I found out I could use  
Them to make rocket fuel  
I used to hang on to my blues' til I finally found the fuse  
Now I'm burnin' rocket fuel
